Analyse concrete reinforcement location, concrete depth and coverage

Local test equipment rental company TechRentals has many clients in the construction and engineering field, and is often approached about issues with measuring and analysing concrete.

The solution:

The Hilti Ferroskan Concrete Reo Scanner is a reinforced concrete imaging system. It has a good size clear display which shows depth of concrete coverage, location of reinforcement rods and anchor setting points. Easy operated, it's a handy tool for those in the building and construction sector, including electricians and plumbers who may need to understand what inside or under the concrete before they drill.

Numerous features on the Ferroskan assist the user, such as the handy depth mode which allows viewing of rods at different levels in the concrete – giving far greater accuracy. With both a printer and PC interface results are easily printed or stored for future use.

The model is suitable for checking depths to 180mm and locating reinforcement rod diameter 6-36mm. An area 600mm x 600mm can be covered in a single measurement, with the 42 image memory easily storing up to 15m².

A simple solution, the Hilti Ferroskan Concrete Reo Scanner can be used for:

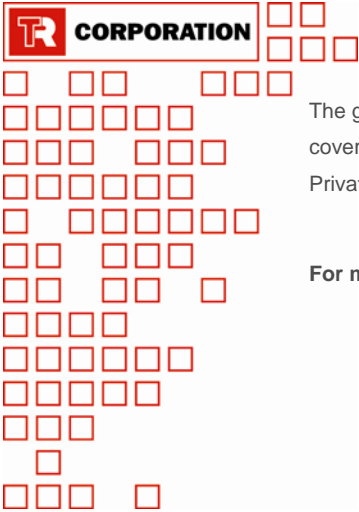

- Locating metal rod reinforcement bars in concrete
- Checking the depth of set concrete
- Locating anchor setting points

About TR Corporation

TR Corporation is a dynamic Australasian organisation delivering specialised technology solutions to blue chip commercial and government clients, via six major brands;

- TechRentals (test and measurement rental)
- VMS (calibration and asset management)
- TR Telecom (satellite & wireless connectivity)
- Bearcom (radio communications)
- Minecom (mining communications), and
- TR Vidcom (Audio visual and computer equipment).

The group has over 20 locations across Australia, New Zealand and Malaysia, staffed by experienced personnel covering equipment rental, sales, engineering and maintenance services. TR Corporation is owned by Advent Private Capital, an experienced equity group listed on the Australian stock exchange.
