

What's all the hype about WiMax?

Leading wireless communications distributor TR Corporation has announced today they are hosting a series of free WiMax technology breakfast's in Perth, Sydney and Melbourne, with WiMax Forum founding member Aperto Networks direct from the US.

In Australia for only one week, Aperto's senior Vice President Worldwide Sales, Bill Waters, will be the highlight of the events. Bill has held senior roles at major telecom carrier solution companies including BayPackets, Terayon's telecom carrier solutions group and Mainsail Networks, before joining Aperto.

WiMax has been a hot topic in recent months, in IT&T circles and with the general public with the news of the proposed OPEL broadband network. However many people are confused about what it actually is, how it can be applied and why it's been so hyped.

Aperto's prime distributor in Australia, TR Corporation is keen to cut away the mystery and show how WiMax is technology that is easily applied to many commercial communication applications.

Participants will learn about international trends in wireless protocols, what is WiMax and how it will benefit their company over the next three years, as well as an overview of Aperto Networks robust solutions for mobile & fixed voice, TDM, video and convergence.

Technology breakfast details:

Perth: 7th December 2007 @ The Duxton Hotel, Perth; 7.45 for 8.00am start

Sydney: 10th December 2007 @ The Stamford Grand, North Ryde; 7.45 for 8.00am start

Melbourne: 12th December 2007 @ Sofitel, Melbourne; 7.45 for 8.00am start

Those interested in attending should contact Michelle Langelaan from TR Corporation's marketing team on 03 9896 3012 or by email at michellelangelaan@trcorporation.com However with so much interest in the subject places are expected to fill early.

About Aperto Networks

Based in California's Silicon Valley, Aperto Networks develops and delivers the world's most advanced WiMAX broadband wireless products for service providers. Aperto serves more than 200 carrier customers in 65 countries, and has an installed base of hundreds of thousands of units worldwide.

Aperto's wide range of base stations, subscriber units, and related equipment enables carriers to offer profitable broadband wireless services in diverse markets via IP-rich, point-to-point and point-to-multipoint networks that are easy to deploy and grow. Aperto's carrier-class WiMAX and pre-WiMAX solutions provide industry-leading subscriber density, quality of service, manageability, and reliability.

Demonstrating a strong commitment to industry standards, Aperto is a founding board member of the WiMAX Forum and chair of the Forum's Service Provider Working Group. The company is also a founder and lead contributor to the IEEE 802.16-2004 and ETSI-BRAN industry standards, and is currently playing a key role in the evolution of the IEEE 802.16-2005 standard.
